ACKNOWLEDGEMENT

Above all, we offer our deepest praise and thanks to the Almighty for being our unwavering anchor, guiding light, and source of inspiration. In every challenge faced and every milestone reached during the creation of these projects, it was divine grace that granted us the wisdom to innovate, the focus to persevere, and the strength to succeed. We remain eternally grateful for the countless blessings, protection, and boundless love showered upon us every step of the way.

It is a privilege to present this e-book compilation of student mini-projects, an initiative made possible through the support of our distinguished management and academic leaders.

We record our sincere thanks to the Management Body—**Mr. S. Rethinavelu**, B.Com., B.L. (Academic Chief), **Thiru. A. Kodeeswaran** (President), **Thiru. A.C.C. Pandian** (Vice President), **Er. R. Sundar**, B.E., M.S. (NTU, Singapore) (Secretary & Correspondent), **Thiru. T. Balamurugan** (Joint Secretary), and **Thiru. T. Thavamani** (Treasurer)—for creating an infrastructure that fosters innovation and practical learning.

We are indebted to **Dr. P. Balamurugan**, M.A., M.Phil., Ph.D. (Principal), **Dr. K. Manimaran**, M.A., M.Phil., Ph.D. (Vice-Principal), and **Dr. S. Ramamoorthy** (Director, Self Finance) for their strategic direction, academic standards, and institutional support.

We express our special appreciation to **Mrs. K. Suganthi**, M.C.A., M.Phil., NET, SET (Head of the Department), whose continuous mentorship, insight, and coordination were instrumental in curating these project works into a digital volume.

Lastly, we commend the students for their hard work, technical skill, and creative problem-solving demonstrated across these projects, as well as the faculty mentors who guided them to completion.

**To my beloved family, my angel Divena
and my loved ones,**

My anchor, my greatest strength, and my
quiet reserve of courage.

Thank you for your endless patience,
unconditional love, and unwavering faith in
me. Everything I build and achieve is a
reflection of the foundation you created
for me.

This e-book is whole-heartedly dedicated
to you.

CODE WITH US

FOREWORD

It gives me immense pride and satisfaction to write the foreword for this compilation of Web Technology mini-projects, conceptualized and executed by our postgraduate students.

As their guide and mentor, I have had the privilege of observing their journey firsthand—watching abstract concepts transform into functional, real-world digital solutions.

The projects featured in this e-book showcase precisely that balance of technical competence and innovative thinking.

Working through these mini-projects has equipped these postgraduate scholars with the practical skills, technical confidence, and analytical mindset required to thrive in the rapidly changing landscape of software development and IT infrastructure.

I congratulate each student author for their hard work and meaningful contributions to this volume. I am confident that this e-book will serve as an inspiring resource for future learners, educators, and technology enthusiasts alike.

BEST WISHES.

Ms. KALPANA DEVI J
